*USD inflation data from <http://www.saving.org/inflation/inflation.php>

*Historical exchange rates according to <https://www.measuringworth.com>

*Before the pound went decimal in Great Britain on Feb. 15, 1971, it was divided into 20 shillings or 240 pence (i.e. 1 /- = 12 d); thus, a value of '3 6' given in Stanley Gibbons converts to $(3 \cdot 12 + 6) / 240$ or $3.5 / 20 = \text{£}0.175$.

*In 1960, the French franc was revalued with the new franc being worth 100 old francs; in 2002, the franc was replaced by the euro at 1 € = 6,55957 FF
